Vitreous-Retinal Disease: Current Insight

10:10 AM to 12:00 NOON

Room: Auditorium, Level 3-East

Combined Meeting with the American Association of Ophthalmic Pathologists

Presiding Officer: J Brooks Crawford, MD, San Francisco, CA

Chairperson: R Jean Campbell, MD, Rochester, MN

Advances in our understanding of diseases that affect the vitreous and the retina have their basis in detailed morphological studies of these tissues, as well as recent discoveries in the field of genetics, expansions in surgical techniques and the opportunity afforded to the ophthalmic pathologist to examine eyes taken at autopsy. This symposium will provide recent information as it relates to both medical and surgical conditions of the retina and the vitreous.

10:10 AM

Introduction

R Jean Campbell, MD, Rochester, MN

Zimmerman Lecture

10:12 AM

Zimmerman Lecture: Oral and Preoral Tears of the Peripheral Fundus

Robert Y Foos, DVM, MD, Los Angeles, CA

10:37 AM

Presentation of the Zimmerman Medal

Elise Torczynski, MD, Chicago, IL

10:40 AM

Perforating Ocular Trauma

Kirk H Packo, MD, Chicago, IL

10:50 AM

Vitreous Detachment as a Complication of Surgery

Harry H Brown, MD, Little Rock, AR

11:00 AM

Vitreous-Retinal Junctions

Hans E Grossniklaus, MD, Atlanta, GA

11:10 AM

Hereditary Retinal Disease

J Bronwyn Bateman, MD, Denver, CO

11:20 AM

Antibiotics and Retinal Disease

Donald J D'Amico, MD, Boston, MA

11:30 AM

Carcinoma-Associated Retinopathies

Alan M Roth, MD, Sacramento, CA

11:40 AM

Radiation Retinopathy

Andrew P Schachat, MD, Baltimore, MD

11:50 AM

Retinal Angiopathy of AIDS

Ben J Glasgow, MD, Los Angeles, CA

12:00 NOON

End of Session
