
Inflammation Re-envisioned in Ophthalmic Disorders

2:00 - 4:00 PM

Room: La Nouvelle Orleans Ballroom B

Combined Meeting with the American Association of Ophthalmic Pathologists and European Ophthalmic Pathology Society

Chair(s): Narsing A Rao MD, Jan U Prause MD

This symposium will provide current overview of sub-clinical inflammatory and repair processes leading to development of common ocular disorders such as age-related macular degeneration, glaucoma, macular edema and retinal degenerations. Specific presentations will include inflammatory products involved in complications related to LASIK, post-inflammatory reparative mechanism resulting in development of glaucoma and evidence for low-grade sub-clinical intraocular inflammatory cascade leading to age-related macular degeneration and various retinal, choroidal degenerations and inflammatory response in neoplasms. Moreover, emphasis will be placed on management of above subtle inflammatory the symposium will be Zimmerman lecture on current concepts on development of intraocular inflammations.
